YELLOW JACKET
CABLE PROTECTORS

YELLOW JACKET CLASSIC

Extra Heavy Duty, Extra Long Life

Yellow Jacket "Classic" is a single piece cable protector designed for extra heavy duty applications. It is built to withstand constant, high speed, heavy traffic from trucks, buses and other vehicles. Yellow Jacket Classic is "The Original and The Best" and outperforms all newcomers.

It is built with 30% more polyurethane than other 5-channel cable protectors that use a dog bone connector. This additional polyurethane keeps a Yellow Jacket in place and gives it higher load capacity, longer life and the ability to absorb abuse that would easily damage other cable protectors. Yellow Jacket's proven durability makes it the best value on the market.

Superior Handling of Heavy, High Speed Vehicular Traffic

Vehicular traffic produces the greatest impact on a cable protector's leading edges and its ramps. Yellow Jacket's superior engineering and materials have been proven in over 20 years of demanding use, making them the most durable on the market. Yellow Jacket® cable protectors are able to absorb significantly more impact from vehicles due to the design of their ramps, which includes:

Proven Durability in Over 20 Years of Use

20 year old Yellow Jackets are still in the field handling trucks, forklifts and other vehicles every day. This toughness is due to:

- Heavy weight construction – a 5 channel Yellow Jacket weighs 28 lbs. – 30% more than other 5 channel cable protectors that use a dog bone connector
- Made from Durathane® – a proprietary cast molded polyurethane with superior tear and abrasion resistance, and dynamic load bearing properties

ADA Compatible Ramps

WASP® ADA compatible special access ramps are available.

Uses the Original dog bone Connector*

- Provides quick assembly and disassembly
- Resists breaking under pressure - will release before it breaks
- Most popular cable protector connector on the market

Protect and Organize Cables, Lines and Hoses

Yellow Jacket offers superior protection for electrical cables, hydraulic and pneumatic hoses and data, video and signal lines.

- Multi-channel design helps organize cables
- Rounded dividers protect cables from snags and tears

Easy to Load

- Yellow Jackets have top hinged lids for easy access

Distinctive Highly Visible Yellow and Black

- Yellow Jacket lids are made in high visibility yellow with contrasting black ramps

Stays in Place

While other cable protectors may shift under stress, Yellow Jackets will stay in place because of:

- Heavy weight construction - a 5 channel Yellow Jacket weighs 28 lbs.
- The Roman Arch™ in the ramp functions like a suction cup when a vehicle passes over a Yellow Jacket

Safety Features

- Skid resistant diamond pattern used on all upper surfaces
- Non-conductive, no metal parts

Wide Variety of Configurations

- 1-5 channel models available
- Channel sizes of 1 1/4" to 5"

“Yellow Jackets have paid for themselves ten times over in damaged cables, lost time and liability reduction.”

Cole Evangelista
Chief Electrician
America West Arena

“We put Yellow Jacket products to the test every day – in the studio and on location.”
